

HOW TO FIND OUR PODCAST

How do you “catch” (find) podcasts?

One way is with Apple’s free software, called iTunes, or any free “podcatching” software which lets you access them on the Internet.

iTunes has a “podcast directory” where you can browse for programs, or through categories, or search for topics that interest you. Check it out by searching for “story4all”!

Once you find the podcast you click the word “Subscribe”. Don’t worry ... it’s free!

This tells your computer that you want to receive all the latest shows that are produced by story4all, and, every time you go online to collect your email after that and you open up iTunes it will automatically update your list of podcasts, deleting the ones you have listened to and adding news ones.

If you have an MP3 Player and hook it up to your computer it will automatically update itself too, so you can take your programming with you.

So, why not check it out now? It’s free!

1. Go to the iTunes page:
<http://www.apple.com/itunes/download/>
2. Download the free software

3. Install and open it
4. Search in the “Music Store” for “story4all”
5. Click “Subscribe” when our page opens up
6. Let your computer download the latest show and then click the  button to download all the other ones that interest you
7. Listen to the podcast shows whenever you want on your computer, or take it with you on your iPod (or other MP3 player)
